

The Little Englishman

Martha Standing Foster (1970)

Notes:

This piece is punctuated and numbered for choral reading. Written for eight readers.

The names actually used for the six sons by the family appear on page ten. 'Harry' = Henry, and 'Teddy' = George Edwin.

The town in England, Ashton-Under-Lyne , on page seven is pronounced "ash·tuhn uhn·dr line".

"Idy hoe" on page eight refers to the steamship ss Idaho, 1870.

The Little Englishman was first recited by Cameron Foster at the 100th anniversary 1970 reunion:

<https://standingfamily.org/archives/CameronLittleEnglishman70.mp3> (audio file) and it has been traditionally performed as a group reading chorus since.

This script is taken from the 2010 group reading: (audio file).

Listening to both of the above readings makes for good practice.

Of late *The Little Englishman* has also been read as a choral reading in our "virtual" reunions in which **only one** person can speak at a time. In this case "All" would be a person designated as the narrator (could be a 9th person) and where there is more than one reader, such as "2 + 3 Whatcha doin' here?" the first listed, #2, would read.

Some of the more recent reunion "highlights"

<https://standingfamily.org/archives.htm> include virtual "Zoom" readings.
